Community Action of Southeast Iowa – Head Start/Early Head Start Family Strengths & Needs Assessment

Parent/Guardian Name:	Head Start Site:
Child Name:	Family Development Specialist:

GUIDANCE

Family Development Specialists will complete the questions below with the families and help them to think about *goals they* would like to set for the year and incorporate as a part of their Family Partnership Agreement.

The Family Strength & Needs Assessment is completed at the beginning and end of the school year, each year. In some instances, families might also have a third (mid-year) assessment completed.

This form is written as if the parent is a single-parent <u>or</u> as if only one parent is completing the form with you today. Please remember to change your questions to "we" statements when there is a two-parent family involved and/or both parents are present during your visit.

The form is also written as though there is only one child in the home. Please remember to change your questions to say "children" to reflect those families that have more than one child in the home.

SCORING GUIDANCE

Each question will be scored on a scale of 1-5. Circle the corresponding score. If a question is not applicable to a family, circle nothing.

Score	How to Score	Meaning
5.0	All criteria are met	Thriving
	<u>OR</u>	
	If question is not applicable	
4.0	Most of the criteria are met	Building Capacity
3.0	Some of the criteria are met	Stable
2.0	One criteria are met	Vulnerable
1.0	No criteria are met	Crisis

If a question completely does not apply to a family, circle 5.0 for the score. Write a note next to the score that the question was "N/A" for your future reference and scoring.

On Mid-Year and Ending Assessments there are no numbers to circle for the scores. You may simply write the number that the score has changed to.
